

Websites worth experiencing

Five business categories.

Three editions for different ambitions.

A guide to the demos, client features, scoped prices and the human work behind a convincing 3D website.

Shaik Ibrahim

Independent website design and development

contact@ibrahimshaik.com

portfolio.ibrahimshaik.com

Planned studio domain: services.ibrahimshaik.com. Domain/DNS connection and public access remain separate launch steps. Current hosted demo preserves owner-private access.

The editions and what the demos prove

Essential

A focused business website with clear information, responsive pages and an enquiry path. Category starter scopes generally include up to five pages with supplied content.

Interactive

A website built around a useful customer task such as finding a room, comparing properties or configuring a product. Starting scope includes up to eight pages and one agreed workflow.

3D Signature

A product or place visitors can inspect through camera movement and labelled controls. We quote scene engineering separately from creating the models or capturing a location.

Demonstration versus a live business

Available in these demos	Needs a production scope
Local carts, reviews and booking requests	Shared database, availability and inventory
Calculated totals and checkout simulation	Merchant payment provider, taxes and refunds
Local concern history	A staffed support process and notifications
Studio email-brief preparation	Server email delivery and delivery monitoring

All five businesses are demonstration brands. Their imagery, sample prices, testimonials and addresses do not establish a real trading business. Ferrari is an independent licensed model showcase. No manufacturer endorsement is implied.

Restaurant / Ember Table

A thoughtful path from first impression to a table request.

Essential

Menu categories and dish information • Venue story, gallery and contact details • Reservation enquiry with clear policies

Interactive

Tasting selections and visual seating • Dish reviews, ratings and helpful votes • Local reservation and concern history

3D Signature

Scroll from arrival into the dining room • Move the camera to a physical wall menu • Inspect dishes and select suitable tables

Model and content context

Original conceptual restaurant. It is not a scan of a client venue. Live reservations, allergy information and operational policies need the restaurant's approval.

A real implementation

A real restaurant supplies its menu, authorised photos, dietary information, booking rules and a defined reservation provider.

Essential	Interactive	3D Signature
₹14,999	₹34,999	₹1,49,999

One-time starting build fees. One supplied venue model, up to five zones, wall-menu interaction and one enquiry flow.

Assets, visits, travel, live integrations, recurring services and applicable taxes are additional unless the written quote includes them. These starting packages do not include every feature shown in a demo.

Demo route: /demos/restaurant/{essential, interactive, 3d}

Hotel & Resort / Stillwater

Help guests understand the stay before they enquire.

Essential

Room collection and guest capacities • Experiences, gallery and stay request • Date and night-count validation

Interactive

Travel moods and a personal stay planner • Room, guest and experience selection • Transparent sample package totals

3D Signature

Continuous arrival, lobby and corridor route • Room selection leads into a connected suite • Bedroom, living space, bathroom and terrace

Model and content context

Conceptual resort with licensed furniture. Room photography is illustrative. It is not a scan or a complete digital twin of an operating hotel.

A real implementation

A hotel supplies room types, availability rules, approved imagery and a booking engine. Channel-manager and payment connections are separately scoped.

Essential	Interactive	3D Signature
₹19,999	₹49,999	₹1,99,999

One-time starting build fees. One supplied environment, up to five zones and one representative suite type. Extra rooms are scoped separately.

Assets, visits, travel, live integrations, recurring services and applicable taxes are additional unless the written quote includes them. These starting packages do not include every feature shown in a demo.

Demo route: /demos/hotel/{essential, interactive, 3d}

Architecture & Real Estate / AURA Estates

Give prospective buyers a useful first view of a home.

Essential

Property details and viewing enquiries • Clear imagery and specification pages • Gallery, story and contact information

Interactive

Budget, property type and bedroom filters • Shortlists and three-property comparison • Room-plan exploration and payment arithmetic

3D Signature

Exterior-to-interior guided camera movement • Held-mouse room viewing and dollhouse orbit • Ground and upper plans with room navigation

Model and content context

Licensed artist-built apartment by FDU_official. The showcase differs from fictional listings and is not a surveyed property. Measurements are not survey evidence.

A real implementation

Actual listings require verified specifications, authorised plans and applicable RERA/state advertising disclosures before publication.

Essential	Interactive	3D Signature
₹19,999	₹49,999	₹1,74,999

One-time starting build fees. One supplied furnished residence, up to five zones, guided walk and dollhouse overview.

Assets, visits, travel, live integrations, recurring services and applicable taxes are additional unless the written quote includes them. These starting packages do not include every feature shown in a demo.

Demo route: /demos/real-estate/{essential, interactive, 3d}

Premium E-commerce / FORM Objects

Let customers inspect, compare and build a personal selection.

Essential

Product pages and concept finish options • Persistent demo bag and delivery arithmetic • Discount and local checkout demonstration

Interactive

Personal edit with saved configuration • Combined search, category and budget finder • Three-object comparison and bag handoff

3D Signature

Two licensed, textured seating studies • Orbit, zoom and close camera viewpoints • Studio lighting and material inspection

Model and content context

Independent furniture studies by Eric Chadwick / Wayfair. They are not exact meshes of catalogue products. Other object details retain labelled procedural studies.

A real implementation

A live shop needs an agreed platform, stock ownership, payment provider and merchant disclosures. Shipping, taxes, returns and grievances need real operating policies.

Essential	Interactive	3D Signature
₹19,999	₹44,999	₹99,999

One-time starting build fees. One supplied product model with material options and inspection. Store platform, payments and inventory are additional.

Assets, visits, travel, live integrations, recurring services and applicable taxes are additional unless the written quote includes them. These starting packages do not include every feature shown in a demo.

Demo route: /demos/commerce/{essential, interactive, 3d}

Automotive / VELOCE

Bring the product details into the customer's first inspection.

Essential

Vehicle collection and specification pages • Configuration enquiry and test-drive request • Ownership story and contact information

Interactive

Paint, wheels and care-package builder • Budget, seats and powertrain finder • Saved builds and side-by-side comparison

3D Signature

Licensed Ferrari 458 Italia inspection • Exterior, rear engine and cockpit views • Part controls, detail cards and finish presets

Model and content context

One adapted Ferrari 458 mesh. Colour presets are not different car models. The engine assembly is illustrative. Ferrari has not endorsed this independent demo.

A real implementation

A dealership supplies authorised vehicle assets, verified specifications and test-drive policies. Inventory, finance and payment integrations need separate approval.

Essential	Interactive	3D Signature
₹19,999	₹49,999	₹1,74,999

One-time starting build fees. One supplied vehicle with usable cabin and engine geometry, up to five hotspots and three inspection views.

Assets, visits, travel, live integrations, recurring services and applicable taxes are additional unless the written quote includes them. These starting packages do not include every feature shown in a demo.

Demo route: /demos/automotive/{essential, interactive, 3d}

Package scopes and planning windows

Essential / from ₹14,999

Up to 5 pages, supplied content, responsive design, SEO foundations and an email enquiry handoff.
Planning window: 2–3 weeks.

One design direction • Two consolidated revision rounds • Contact brief and launch handover • 30 days of in-scope defect fixes

Interactive / from ₹34,999

Up to 8 pages and one scoped customer journey such as a finder, planner or configurator. Planning window: 3–5 weeks.

Everything in Essential • Search, filters or comparison as scoped • Browser-local proof of the core flow • Live integrations quoted separately

3D Product / from ₹79,999

Up to 5 pages, one supplied web-ready model, three camera views and up to five product hotspots.
Planning window: 4–6 weeks.

Orbit and close-up inspection • Lighting and material presentation • Reduced-motion and non-3D alternatives • Model creation and licenses excluded

3D Spatial / from ₹1,49,999

Up to 8 pages and one supplied connected environment with up to five guided zones. Planning window: 6–10 weeks.

Continuous camera journey • Room or zone navigation • One scoped enquiry journey • Capture, reconstruction and travel excluded

3D Bespoke / from ₹2,99,999

Complex environments, detailed product interiors or multi-part configuration, scoped after asset review. Planning window: 10–16+ weeks.

Custom interaction specification • Agreed performance and device targets • Staged prototype and asset approval • Specialist production quoted separately

Planning windows start after scope approval, agreed deposit and complete content/access. Asset-heavy work can exceed these ranges. We confirm target devices and model limits before committing to the schedule.

3D assets, capture and location visits

Work item	Studio planning fee
Feasibility review	₹7,500
Half-day reference/capture visit, up to 4 hours	₹7,500
Full-day reference/capture visit, up to 8 hours	₹12,500
Simple product asset allowance	₹10,000–₹30,000
Detailed product / vehicle allowance	₹40,000–₹2,00,000+
Furnished room reconstruction allowance	₹25,000–₹75,000
Whole venue reconstruction allowance	₹1,00,000–₹4,00,000+

These are Ibrahim Studio planning allowances, not supplier quotes or market averages. The feasibility review includes an asset inventory, capture plan and written scope. Its fee is credited against a 3D build commissioned within 30 days. It does not include capture.

A visit is one stage of production

Reference capture, geometry reconstruction, texture cleanup, material work, web optimisation and interaction testing each take time. Glass, mirrors, movement and low light can reduce scan quality. A phone scan cannot guarantee a perfect digital twin.

Travel, accommodation, scanner rental, assistants, specialist operators and ongoing tour subscriptions are additional and require written approval before booking. The owner/manager must authorise access. The client prepares agreed areas and removes sensitive documents or personal data. Drone capture is excluded unless separately scoped with current permissions.

An example 3D budget

Illustrative hotel scope: a supplied connected environment, up to five zones and one representative suite type. The following adds a detailed asset allowance and two full-day reference visits.

Line item	INR
Hotel 3D starting build	1,99,999
Detailed asset / room allowance	75,000
Two full-day visits at 12,500	25,000
Indicative subtotal	2,99,999

Excluded: travel, accommodation, specialist capture/equipment, paid model licences, recurring services and applicable taxes. The asset allowance must be replaced by a reviewed line-item quote before commitment. This is not an offer to reconstruct an entire resort for this subtotal.

Why the website and asset fees differ

The build fee pays for page design, camera logic, interactions, optimisation and agreed testing. The asset fee pays for geometry and believable surfaces. Location fees pay for on-site time. Changing a floor plan or adding a vehicle interior can change all three scopes.

Care after launch

Essential care starts at ₹1,999/month for up to one hour of content work and a monthly health check. Interactive care starts at ₹3,999/month for two hours and core-flow checks. 3D care starts at ₹6,999/month for three hours and agreed scene/device checks. Hosting, new features, replacement models and rescans are separate.

Commercial conditions

Written scope and payment

The signed statement of work lists deliverables, acceptance criteria and target devices. Standard proposal milestones are 40% kickoff, 40% approved prototype and 20% before launch/handover. Quotes remain valid for 15 days unless stated otherwise. Applicable taxes are itemised. This site makes no GST-registration claim.

Revisions and changes

Two consolidated revision rounds apply to the agreed direction. Additional pages, a new design direction after approval, changed assets and extra integrations require an approved change quote.

Cancellation and fairness

On cancellation, we account for completed work and approved non-recoverable third-party costs. Unearned balances are refundable under the agreement and applicable law. A missed or unprepared visit can require an agreed revisit charge.

Ownership and handover

The client receives the commissioned deliverables specified in the agreement after payment. Third-party models, libraries, fonts and photography retain their licences. Source files and raw capture data are included only where the handover scope says so.

Support and limits

30 days of post-launch defect fixes cover reproducible deviations from the agreed scope. New features and third-party changes are separate. Marketing visualisations are not surveys, valuations or engineering certification. No device-independent frame-rate or exact-photo realism guarantee applies.

The final agreement controls the project and preserves statutory rights. Commercial guidelines here are not legal or tax advice.

Privacy and industry launch requirements

Privacy and enquiry data

The studio form prepares a brief on the visitor's device. It does not store it in a server database or local storage. Copy/download/email are explicit visitor actions. Email providers then process messages the visitor sends. Demo records remain local until deleted.

Indian data-protection framework

The DPDP Rules, 2025 use phased commencement under Rule 1. Applicability must be assessed at the actual launch date. A real deployment needs notices, an appropriate legal basis, retention rules, access controls, incident handling and a contact for privacy requests. These demos do not certify compliance. [5]

Live commerce

Before accepting orders, confirm the merchant identity, prices, refund/return policy, shipping information, payment provider and grievance process required for the business. A local complaint draft is not a functioning merchant grievance channel. [6]

Property marketing

Actual property listings need verified facts and applicable RERA/state advertisement requirements. A fictional showcase or a generic disclaimer cannot substitute for genuine project approvals. [7]

Capture permissions and content rights

Obtain owner and subject permissions as appropriate. Remove personal documents and faces or obtain releases. Confirm image/model licences. Google image search results are not a reuse licence. Restaurants, resorts and vehicle operators approve their own operating, safety and advertising claims.

Obtain qualified legal review for the actual business and jurisdiction. This checklist does not describe every obligation or create a compliance warranty.

Demo readiness and domain handover

Demo walkthrough

Use the Work directory to switch editions and compare the experience. Start with the core customer task, then show the 3D inspection. Use sample data. The demo guide explains controls and offers a deliberate local-data reset.

Models and verification

The AURA residence and Ferrari inspection use detailed licensed assets. The FORM atelier uses licensed seating meshes. Stillwater now uses the licensed sofa mesh within its original conceptual architecture. Restaurant and resort architecture remain procedural concepts. Cloud-browser WebGL is unavailable, so final GPU shading and motion still need a representative device check.

Domain deployment

The intended destination is services.ibrahimshaik.com. The present Sites deployment remains owner-private. Public visitors need an explicit access change and the domain's DNS/hosting configuration. Preserve the separate portfolio site and its records.

Live contact and business systems

The studio brief has direct email, copy and download alternatives. Automated server delivery requires a mail provider and credentials. Real booking, commerce, support and inventory need a defined backend and operator processes. These are not silently enabled by the demo.

Before public sharing

Verify desktop and mobile GPU behaviour, keyboard paths and reduced motion. Review downloadable documents, prices, model credits and contact delivery. Approve the business identity and policies. Connect the domain, enable the intended audience and test from a signed-out browser.

Pricing evidence and source notes

Research reviewed 25 October 2026. Public offers have different scopes and inclusions. They are asking prices and provider-authored guides, not verified transaction data or an independent statistical market survey. Our prices are scoped studio decisions.

[1] Web Designer India: published website packages

Advertises ₹15,000, ₹25,000 and ₹45,000 packages with different page counts and inclusions.

<https://www.webdesignerindia.in/packages/website-design-plans/>

[2] LaunchRoom: public package pricing

Advertises ₹14,999 one-page, ₹24,999 five-page and ₹44,999 broader packages. These are asking prices, not verified transactions.

<https://launchroom.in/pricing>

[3] studiokalex: 3D website cost guide

One agency guide describes ₹1–3 lakh for a product viewer and ₹3–10 lakh for a scroll-led 3D site. Scope differs from our starter offers.

<https://www.studiokalex.com/blog/3d-website-cost-india-2026-pricing-guide>

[4] studiokalex: product modelling cost guide

Separates modelling from rendered images and cites complexity-dependent product-model ranges. Supports quoting asset production separately.

<https://www.studiokalex.com/blog/3d-product-rendering-cost-india-2026-pricing-guide>

How the evidence informed our rate card

The ordinary website offers support positioning a scoped small-business entry around ₹15,000 rather than promising a full business site for ₹4,999. The 3D guides separate asset production from interaction engineering. Our entry 3D prices assume supplied, usable assets and narrow scope, so they should not be compared with full custom productions without adjusting deliverables.

Regulatory references and model credits

[5] MeitY: Digital Personal Data Protection Rules, 2025

Rule 1 sets phased commencement. Avoid blanket claims that every provision is already operational.

<https://www.meity.gov.in/static/uploads/2025/11/53450e6e5dc0bfa85ebd78686cadad39.pdf>

[6] Consumer Protection (E-Commerce) Rules, 2020

Live commerce requires merchant disclosures, consumer information and a suitable grievance process.

[https://thc.nic.in/Central%20Governmental%20Rules/Consumer%20Protection%20\(E-Commerce\)%20Rules,%202020.pdf](https://thc.nic.in/Central%20Governmental%20Rules/Consumer%20Protection%20(E-Commerce)%20Rules,%202020.pdf)

[7] Ministry of Housing and Urban Affairs: RERA

Real property marketing must follow applicable central and state requirements. Fictional demo listings are not offers.
